

## PEDESTALS & SPHERES

### PEDESTALS AND SPHERES

As part of a 'finial set' we offer two different size pedestals that can be used to raise a sphere off a pier cap; the two pedestals are 230mm and 340mm square respectively.

Spheres, along with a pedestal or as part of a finial set are offered in the following sizes: 215mm, 230mm, 340mm and 450mm diameter.

Any of our four-times weathered pier caps can be adapted to allow the incorporation of a sphere with or without a pedestal.

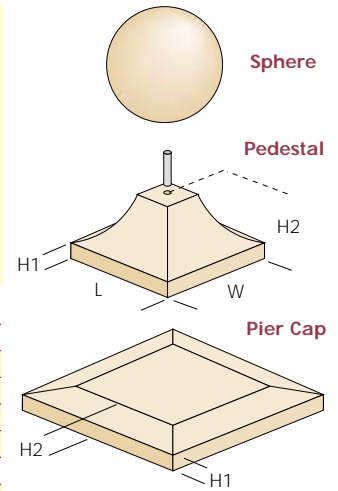

### SPHERES

Ref	W/L	H2	H1	Diameter (D)	Weight
SPH215	-	-	-	215	14
SPH230	-	-	-	230	16
SPH340	-	-	-	340	43
SPH450	-	-	-	450	99

### PEDESTALS

PED1	230/230	100	50	-	11
PED2	340/340	200	50	-	40

**PIER CAPS** Any of our pier cap units can be converted to allow the incorporation of a sphere with or without a pedestal.

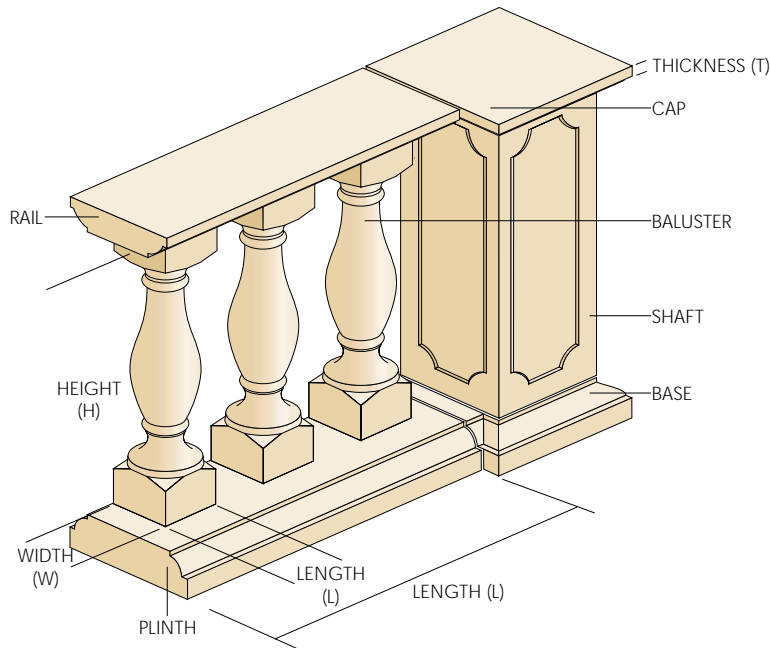

## BALUSTRADING

### BALUSTRADING

Using an elegant profile of baluster, we can offer an array of plinth, rail and cap profiles that offer a number of possible balustrading applications.

Due to the variety of profiles available, we suggest that when considering balustrading, early consultation with our Sales Office is sought for design input. All such design work will need to be approved prior to the undertaking of production.

#### NOTES:

1. All balusters to be site fixed using the supplied stainless steel dowels
2. Rails and copings, although supplied in wall lengths, will require site drilling
3. Spacing of balusters to be determined by PD Edenhall after consultation with client

### BALUSTRADING

Ref	Length (L)	Height (H)	Width (W)	Weight (kg)
BALUSTER	148	585	148	19
PLINTH	1000	115	325	varies
RAIL	1000	80	230	varies
BASE	400	115	400	varies
SHAFT	320	585	320	varies
CAP	400	80	400	varies
