

Flood Relief Scheme at Shrewsbury

The scheme, under the control of the Environmental Agency, provides both effective defence against the River Severn whilst retaining a pleasing façade to the riverbank.

Dean & Dyball Ltd consulted with PD Edenhall at an early stage of the contract and requested that trials be carried out to ensure a strong colour match as needed by the client on this environmentally sensitive planning requirement. The contract was completed in December 2003, and included over 8,000 Walling Blocks of various sizes and designs along with hundreds of special-shaped and angled quoin units.

To cap off the walling to this and the Shrewsbury and Atchenham Borough Council's Headquarters, some 1,200 twice-weathered, bullnose finished copings of two lengths were supplied, along with elliptical copings with special angles and returns. The complete contract was worth in excess of £125,000.
